PROJECTS

C-lack (Rails, React, PostgreSQL, JavaScript, Redis)

[live](#) | [github](#)

Single-page web app allowing users to communicate in real-time, inspired by Slack

- Implemented WebSockets using Rails ActionCable to establish a persistent connection between the user and the server.
- Ensured calls to the database run asynchronously through the use of AJAX and Thunk middleware.
- Created polymorphic associations in Rails with users on messages and channels.

Minion Wars (Mongo.db, Express, React, Node.js, HTML5)

[live](#) | [github](#)

Web app allowing users to collect digital assets by exchanging digital currency

- Built user authentication by encrypting user details with JSON Webtoken to be used with Axios to be decrypted with the JWT-Decode library in the frontend.
- Included Validator.js library to check model validation for the inclusion of password & email upon login.
- Engineered a smooth and functional UI with custom CSS to provide users with an interactive experience.

Elite Baby (JavaScript, HTML5 Canvas)

[live](#) | [github](#)

Side-scrolling platform game, where the user collect baby bottles and tries to reach the end of the level

- Incorporated axis-aligned algorithm to detect collision between user and objects.
- Designed multi-layer canvas with various velocity for an attractive background.
- Formulated level design with Object-Oriented Programming for simple map additions.
